

## Production advice ware potatoes TRADITIONAL FRESH

- Good yield
- Uniform tuber size and shape
- Bright, dark red skin
- Good dry matter content
- Good resistance to common scab

### Agronomic characters

Maturity	63	Medium late
Dormancy	67	Medium
Yield mature	103	Moderate high
Tuber size	83	Large
Tuber shape		Oval / Long oval
Number of tubers		9-11
Skin colour		Dark red
Flesh after cooking		White
Cooking type		B - Slightly mealy
Dry matter content/Starch		19,3% / 13,4%
UWW/Specific gravity		351 / 1,075
Internal bruising	9	Little sensitive
Metribuzin sensitivity	65	● ● ● ● ●
Little Potato disorder	83	● ● ● ● ●

### Plant populations

Seed size	Plant population/ha	Row distance	
		75 cm	90 cm
28/35	50.000	27	22
35/45	44.000	30	25
35/55	42.000	32	26
50/55	39.000	34	28
55/65	37.000	36	30

Always check the tuber count for an accurate calculation.

### Resistances

Foliage Blight	44	● ● ● ● ●
Tuber Blight	59	● ● ● ● ●
Alternaria	90	● ● ● ● ●
Common scab	67	● ● ● ● ●
Powdery scab	58	● ● ● ● ●
Spraing	93	● ● ● ● ●
PVY	25	● ● ● ● ●
Yntn tuber tolerance	98	● ● ● ● ●

#### PCN Resistance

Ro1/4	9	● ● ● ● ●
Ro2/3	3	● ● ● ● ●
Ro5	*5	● ● ● ● ●
Pa2		● ● ● ● ●
Pa3		● ● ● ● ●

#### Wart disease

F1	8	● ● ● ● ●
F2	3	● ● ● ● ●
F6	3	● ● ● ● ●
F18	*1	● ● ● ● ●

### Fertilizer

- Adapt fertilization to soil analysis.
- Always refer to the local and current rules about crop fertilization.
- No nitrogen late in the growing period to avoid growth cracks and second growth.
- Split application can prevent excessive initial foliage growth.
- Apply 2/3 before planting and 1/3 as top dressing.
- Nitrogen (N) : Medium inputs (170-210Kg N/Ha inclusive of soil supply).
- Phosphate (P) and Potassium (K) : according to standard advice.

## Production advice ware potatoes TRADITIONAL FRESH

### Pre-treatment and planting

- The dormancy is medium long, a heat treatment is not necessary.
- Allow the seed to acclimatize to the local conditions before planting.
- FLAMENCO can be grown on all soil types.
- Planting with small white sprouts produces the best results.
- FLAMENCO is tolerant to little potato disorder, planting can take place early.

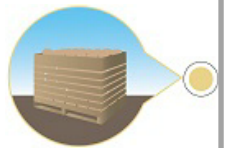

### Growing attention points

- Emergence is uniform with a good foliage development.
- FLAMENCO is quite sensitive to metribuzin, only use it pre-emergence.
- Use a robust Phytophthora programme, to prevent foliage and tuber blight
- Preventive spraying against Phytophthora is advised.

### Haulm killing and harvest

- Haulm killing on a slightly green foliage will result in a brighter skin.
- In general, FLAMENCO has a good stolone detachment and early skin set.
- To keep a bright and smooth skin, the tubers should not be left too long in the soil after haulm killing.
- Tubers are big. Harvest and store with care to avoid damage and bruising.

### Storage

- FLAMENCO is suitable for long term storage.
- Dry quickly after harvest and keep dry to help prevent silver scurf.
- Don't store tubers too cold when they are used for second (autumn/winter) crop.
